

# TRUDAB

## Instruction Guide

## Introduction

Congratulation on purchasing the most unique, convenient and portable deluxe wax vaporizer that we have ever developed. Created with advanced materials and technology, the TruDab is a vaporizer like no other. TruDab heats up and vaporizers wax to achieve the best possible results. Easy to use, it works in all environments, including a windy day outside, a rainy afternoon at the park, camping up in the mountains or enjoying a night in at home. After a short charge, your device is ready to use. Simply dab on your favorite wax, pop the magnetic cap on, press the fire button, and inhale. Our powerful coils heat up very quickly and provide the best vaping experience possible. With the Greenhouse TruDab, you can dab in style.

## Contents

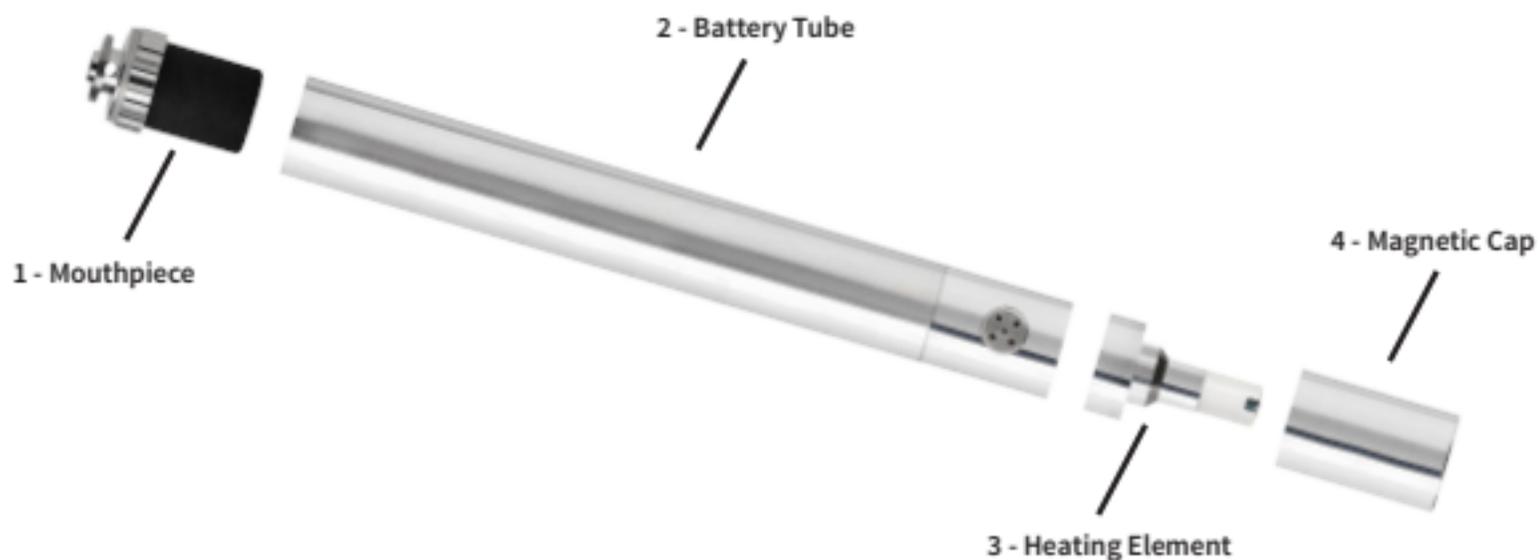

- 1 - Greenhouse TruDab Vaporizer
- 2 - 360mAh 3.7V re-chargeable batteries
- 1 - Replacement coil

- 1 - USB Charger
- 1 - User manual

## Device Anatomy

1. Mouthpiece
2. Battery Tube
3. Heating Element
4. Magnetic Cap

## **Features and Specifications:**

**Device Size:** 172mm(L) \* 15.5mm(D) 2 X 360mAh 3.7V Removable batteries with magnetic cap design.

**Battery Capacity:** 3.7V-360mAh 10440 batteries. Batteries are removable and rechargeable. With Fully charged batteries the device will reach 8V. Supported atomizer resistance is >1ohm.

**Atomizer:** The Trudab coil uses a Nichrome heating coil wrapped in a ceramic guard. Under load the coil resistance is 2ohms, the TruDab features onboard short-circuit protection to protect the device from overheating and failure.

**To Power On/Off:** Before using the device, please make sure you have installed both batteries in the correct position. Once the batteries are installed press the power button on the unit 5 times rapidly in succession to power the device on. The power light will flash 3 times to let you know the device is on.

## Using the Wax Atomizer

To use the wax atomizer, attach the atomizer directly to your battery. The atomizer should thread on clockwise to the battery. Place no more than half a pea size of wax directly to the coil without pressing down on the coil. Take the mouthpiece and slide it over the atomizer. Begin vaping by pressing and holding down the power button while inhaling through the mouthpiece. Keep power button pressed while vaping.

## **Charging**

If the battery voltage is under 6.6V, then the led light will flash 10 times to remind you that the device needs to be charged. You need to remove the two batteries to recharge via the included external charger.

## **Malfunction Indication and Protection:**

### **1. Overload protection**

If output load goes under .5ohm during use the device will enter protection status. The led light Will flash 3 times. At this time, the coil will not function.

## Malfunction Indication and Protection Cont.

### 2. Short circuit protection

If a short circuit happens during use, the led light will flash 3 times and the device will enter protection status. During this time the device will not fire until a new coil is applied or the short circuit is resolved.

### 3. Reverse polarity protection

In case you install the batteries in the incorrect direction, the device will recognize that and will not function until the batteries are removed and placed in the proper direction.

## Warranty

Greenhouse products are guaranteed to be free from manufacturer defects for 90 days from the purchase date. This limited warranty covers defects in materials or workmanship in the Greenhouse TruDab kit and accessories. This warranty is non-transferable and is intended for coverage from the original purchase only. Improper use of this product may cause the unit to malfunction and will void the warranty.
